

EVOS Fleet Home22

EV Fleet 22kW AC Home Charger

The Fleet Home22 has been designed to meet and simplify the challenges of fleets and business transitioning to electric.

EVOS designs and manufactures its EV charging products in Australia to deliver quality, performance and innovation. The EVOS Fleet Home charger has been designed to simplify charging for fleets needing to charge at the home.

EVOS Fleet Home22

FAC22-001

Simple to swap cables

Easy to install

Remote management

Install as single or 3phase

EV Charger Specification

Charging power	Up to 7.4kW (1P) or 22kW (3P)
Connector type	Type 2 or 1
Maximum output current	32 amps per phase
Nominal AC frequency	50 Hz / 60 Hz
Input voltage	110 to 230 V AC (L-N)
Operating temperature	From -25°C to 50°C
Relative humidity	Max. 95% non-condensing
Ingress protection	IP65
Cable length	5m optional up to 6 m
Impact protection	IK10
Dimensions (dxw)	380 x 100 mm
Charger weight	2.9kg
Communication	Wi-Fi 2.4GHz IEEE 802.11.b/g/n Bluetooth 4.1, Ethernet 10/100M optional: 4G (LTE Cat M1)
Communication protocol	OCPP 1.6j, upgradable to 2.0
Storage temperature	From -30°C to 85°C
Packing weight	8.2kg
Packing dimensions (lxdxw)	450x450x200 mm
Protection	Built-in 6mA DC RCD. Only type A RCD + MCB required
Colour	Black Piano
Hmi	LED with dedicated apps
Certification	CE certified
Standards	IEC 61851-1, IEC 61851-21-2 EU RoHS Directive Compliant
